Vintage Conditions

2013 saw low rainfall in Spring with January being quite dry and warm. The dry weather allowed fruit to reach optimum ripeness providing a good balance of acidity and flavour. Some light showers in late February to help freshen the fruit with vintage starting later than usual but finishing quickly by the end of March.

Winemaking

Fruit was selected by the winemaker and picked when both flavour and tannins were optimum. Average seven days on skins at 22-25°C.
