

The last model of Aston Martin (unique model in Spain) parks at Vilarnau

The last Aston Martin model arrives to Spain for the first time and its first stop is Vilarnau.

An original photograph sitting of this car took place in the gardens and in the winery. This photographic report will allow these exclusive Club members to know the new car. This Club was thought to satisfy the interest for enjoying the best cars in the world of a selected group of people. Mercedes Mc.Laren SLR, Ferrari, Bentley Continental GTC, Porsche 911 4S Cabrio, Maserati, Lamborghini, among others, keep at the disposal of all members.

The members of this private Club share the same passion for high performances cars as well as for new driving experiences. According to the Club's President, all of them have a high purchasing power but they have long working days too, so that they really have a lack of free time. This is the reason why GT-Club organises joint trips to places with beautiful exteriors and accessible by secondary roads, so that the driving becomes easier. Vilarnau collects all these conditions, so hopefully we will turn into their new destination.
