

## Red Electra

For several years, some of our avid Electra fans have been asking for a red version of Electra. In the year 2000 we had fun making a small batch. The reception was so overwhelming, it flew out the doors. The wine even received a double gold medal at the San Francisco Fair. It has continued to take flight and win medals every year since.

On the label of Red Electra there is an angel soaring in a red dress and it is after dark. She could be going to a party. There is something exciting about an angel wearing a red dress going to a party after dark. This will be a very good party.

Red Electra is a yummy wine with only 5% alcohol, a pretty red color, a grapy sweet taste, and a tangy, spritzy mouth feel. It's a good wine for angels to drink when they party.

We don't advise drinking Red Electra before noon. Red Electra has attitude. Red Electra will change your attitude. If you take Red Electra to a party, it will change everybody's attitude.
